

# Sprint Comparison: Task Amount Changes

## Sprint Comparison: Task Amount Changes

### Sprint 1 Overview:

- Focused on foundational features like quiz creation, frontend integration, and basic user interaction (e.g., toggling modes and styling).
- Number of tasks: 15.
- Goals:
  - Establish the groundwork for the platform.
  - Focus on functionality and user interface consistency.

### Sprint 2 Overview:

- Expanded on Sprint 1's foundation by introducing advanced features like automatic grading, deadline management, and pause/resume functionality.
- Number of tasks: 9.
- Goals:
  - Enhance usability for both teachers and students.
  - Add flexibility and time management features.

### Reasons for Task Decrease:

- Streamlined Scope: Tasks in Sprint 2 were more focused and well-defined compared to Sprint 1.
- Improved Efficiency: With Sprint 1's foundation established, fewer tasks were needed to implement advanced features.
- Focus on Quality: The team aimed to refine existing features and address complexities within a smaller task set.

Impact of the Changes:

- Decreased task count reflects a more focused and efficient approach.
- Quality improvements and better-defined objectives allowed the team to achieve the sprint goals with fewer tasks.
